

ADDENDUM #1

Maricopa Flood Control District

DATE: 10/20/2021

RFP NO: SRW2022.01A

EFFECTIVE DATE: Immediately

PROJECT LOCATION: Santa Rosa Channel north of Miller Road, continuing to Ak-Chin Reservation boundary, approximately 1.6 miles.

DESCRIPTION:

Addition to Original Scope:

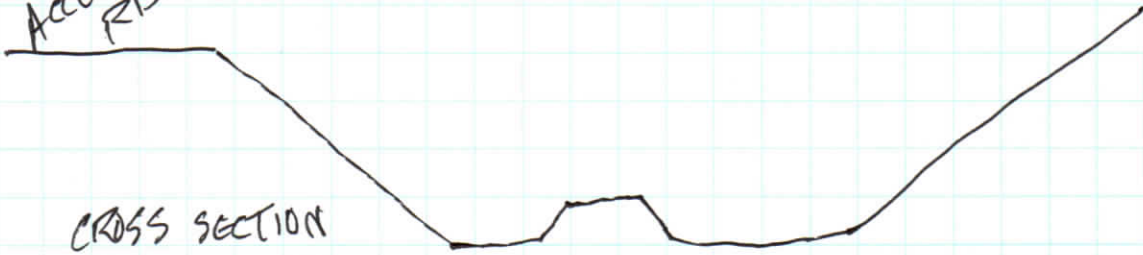

In the curve, about a half mile north of Miller Road, the east bank is eroded from recent storm flows. For a length of about 500 yards, which is staked by MFCD, both banks should be restored to be consistent with the slope of the bank in that area. (Over the entire project, the slope varies inconsistently.) In some areas, it may be necessary to bring fill material from downstream or from the west bank.

See attached illustration of typical scenarios, Attachment "A".
